

Environmental Monitoring

Continuous Monitoring of flow, pH and suspended material.

Water Quality and Quantity

- Level of surface water
- Level of groundwater
- Amount (flow) of the water... liter – m³/sec
- pH
- Conductivity
- Redox
- Oxygen
- COD, BOD – indirect measurement
- NO₃ and NO₂
- NH₄-N
- PO₄-P
- Tot. P
- Tot. N
- Suspended solids
- Turbidity
- Heavy metals
- Metrological parameters; direction of wind, speed of the wind, temperature, rain, solar radiation, relatively humidity

MRM Konsult AB offers the monitoring stations, facilities services for automated monitoring of water discharge and water quality.

We serve a wide range of business sectors, including agriculture, forestry, mining, peat harvesting, water supply, sewage and waste management.
